

Standard Color Concentrates

With an eye for enhancing customer experience, we have standardized some of our more popular colorants.

Our standard whites and blacks colorants are available in masterbatch and in multiple resin systems including: ABS, PS, EVA, PE, Nylon, PP, PC, and LDPE.

Compliant to FDA, as well as other regulatory standards, we offer high quality standard colors for use in injection molding, blow molding, compression molding and extrusion.

In addition we have products to meet EIA-359, SAE J-1158 and NEMA color standards.
