

G- Series Highly Loaded Color Concentrate Technology

- The **G3®** product can be used with practically any resin system
- Reduce **cost-to-color** even when compared to liquid color
- Achieve **20%** or more increased pigment loading levels without compromising pigment dispersion
- **G3®** offers formulations with **40-45%** loading of dyes in some resin systems
- Offers formulations with **50%** or more pearlescent pigment, nearly doubling the historical industry standard of **30%**
