

MicroBlok®

Chroma Color Corporation offers two types of antimicrobial master batches, **MicroBlok®Z** and **MicroBlok®S**. These master batches are comprised of either Zinc Pyrithione or Silver Ion technology.

- **MicroBlok®** master batches can be customized in many different polymer resin systems to meet customer requirements.
- **MicroBlok®** master batches can be produced as a natural additive master batch or incorporated into color master batches and pre-colored compounds
- **MicroBlok®** products are intended to impede the growth of microbes and bacteria on the product's surface and are not intended to be a substitute for good hygiene or to prevent foodborne or infectious illnesses.
- **MicroBlok®** products in some cases meet FDA requirement but with restrictions and specific guidelines.

**Disclaimer: Chroma Color Corporation makes no specific claims of efficacy. The customer needs to test their end product for proper performance.*
