- A2LA accredited
- Complete Lot & Ingredient Traceability
- Speed & Service for JIT inventories
- Small Batches 25-50 lbs
- Wide Range of Additives
- Special Effects: pearlescent, iridescent, metallic, & fluorescent.

Drug Master File (DMF)

Chroma Color Corporation DMFs provide the Food and Drug Administration [FDA] confidential, detailed information about facilities, processes or articles used to manufacture, process, package or store drugs intended for human use. Without a DMF, medical & pharmaceutical companies would have to communicate the same information to the FDA separately - a more time consuming and costly process.
