

Products and Applications

Epolin is known the world over for our expertise in optimizing IR light absorbance and visible light transmittance in a myriad of thermoplastic and thermoset polymeric materials such as polycarbonate, acrylic, polyamide, cellulose propionate, polystyrene, PVC, COC and polyurethane. Our materials add performance and value to your products.

DYES FOR THERMOPLASTICS

DYES FOR COATINGS

VISIBLE OPAQUE MATERIALS

HEV LIGHT ABSORBERS

FORMULATED DYE PELLETS

SUN LENS DYES

LASER ABSORBING COMPOUNDS

WELDING DYES

Applications

- Laser Protection and Filtering
- Welding and Arc Flash Safety
- Sun Glasses & Sports Goggles
- Autonomous Vehicles & LiDAR
- Anti Counterfeiting and Anti Forgery
- Machine Vision and Detection
- Night Vision Equipment
- Medical Testing & Equipment
- Industrial Vision Systems

Markets

- Eye Protection
- Vision Enhancement
- Automotive
- Security Printing
- Camera & Machine Vision
- Defense & Aerospace
- Medical & Biological
- Industrial
- Consumer Electronics
