

ChromaPCRPET™

Chroma Color Corporation has developed a unique product line explicitly designed for use with recycled materials. ChromaPCRPET™ allows brand owners to further increase the levels of PCR within their package, supporting increased Sustainability Goals.

Key Features of ChromaPCRPET™ include:

- Ability to use in sheets, bottles and other applications
- Product is commercialized
- Product is FDA compliant with No Objection Letter (NOL)
- Chroma Color offers correction colors for PCR, chain extenders, processing stabilizers and other additives for recycled PET streams
- Final product 100% PCR content

Paths can be developed independently or in conjunction with the Chroma Color G3® patented manufacturing technology... driving to the absolute lowest let-down ratios in the industry, and thereby providing your business with the desired aesthetics along with an extremely low overall cost-to-color spend.
