

ChromaXLPEUltra

ChromaXLPEUltra Color Concentrates

--Chroma's new formulated high intensity vibrant color pigments.

- Specialty designed with proprietary pigments, additives, and carrier resins.

- Each concentrate is suitable and intended for the full range of FR blend choices in XLPE constructions from 80/20 (20 percent FR) to 50/50 (50 percent FR), while using a reduced range of 1% - 2% color loadings with VWI (Vertical Flame Rating).

- Suitable applications include FR Urethane, FR zero halogen PE, XLPE, XLPO standard Polyethylene insulation compounds.

About ChromaXLPEUltra Product Line:

- Advanced XLPE formulations specifically designed for harsh environments such as construction, mining, refineries, nuclear/hydrogen plants, transcontinental power transmission, and aerospace.

- Upholds superior mechanical properties, used in low smoke zero halogen XLPE compounds and meeting ROHS, REACH, HMF requirements for sustainable products.

- XLPE (UV) solutions designed for the rapidly evolving markets such as automotive/transportation (EV & Hydrogen).

- XLPEUltra products meet UL 746C & ASTM standards, ensuring reliability and safety

- XLPE (UV) solutions designed for the rapidly evolving markets such as automotive/transportation (EV & Hydrogen). These products meet stringent ASTM standards, ensuring reliability and safety.
